Github: <https://github.com/abhishekshah138>

E-mail: abhishekshah1388@gmail.com

Mobile: +91 8120551088

SKILLS

Programming:	C, C++, Java, Python, SQL, HTML, CSS
Tools:	Nmap, Metasploit, Burp Suite, Wireshark, FFUF, Msfconsole
Platforms:	TryHackMe, HackTheBox, PortSwigger, Hackerone
Soft Skills:	Analytical Thinking, Enthusiastic, Problem solving, Adaptability

PROJECTS

Telegram Remote Client Server Architecture Github	Jan' 2026
- Designed and developed a Telegram-controlled remote administration framework for cybersecurity research, focused on analyzing command-and-control (C2) communication patterns and adversary behavior within controlled lab environments. - Implemented a modular Python client-server architecture with Telegram Bot API integration, enabling remote execution and resilient communication handling. - Simulated real-world C2 communication workflows to assess reliability and detection challenges, enhancing understanding of adversarial behavior and monitoring strategies. Tech Stack: Python, Telegram Bot API, Client-Server Networking, Async I/O, Logging, Malware Behavioral Analysis	
Honeypot for Real-Time Threat Observation and Analysis Github	Nov' 2025
- Developed a modular, Python-based honeypot to detect, monitor, and analyze unauthorized access attempts across simulated services. - Implemented SSH and HTTP protocol support with a graphical interface, capturing attacker metadata including IP addresses, credentials, executed commands, and request patterns. - Enabled analysis of real-world intrusion behavior to identify attacker techniques and potential network security weaknesses. Tech Stack: Python, SSH, HTTP, GUI Frameworks, Logging & Data Visualization Tools	

TRAINING

Java Maestro: Hands-On Training on Developing GUI Applications Certificate	Jun' 2025 – Jul' 2025
- Built a Java Swing-based Quiz Application featuring a multi-screen GUI, timers, event handling, answer validation, and automated scoring using OOP principles. - Applied event-driven programming concepts to design structured application workflows and responsive user interactions. - Completed a 6-week intensive training program with hands-on contributions to UI design, core logic implementation, debugging, and documentation.	

CERTIFICATIONS & CERTIFICATES

• Certified Junior Web Application Penetration Tester (C-JWAPT) Sturtle Security Certificate	Mar' 2026
• Certified Social Engineering Defense Practitioner (CSEDP) SecOps Certificate	Feb' 2026
• Privacy and security in Social Media NPTEL Certificate	Dec' 2025
• Ethical Hacking Essentials (EHE) EC-Council Certificate	Mar' 2025

ACHIEVEMENTS

• Ranked in the Top 1% globally on TryHackMe based on consistent performance across cybersecurity labs and practical challenges.	Dec' 2025
• Secured Global Rank 125/8130 teams in the Cyber Apocalypse CTF 2025 hosted by HackTheBox.	Mar' 2025
• Competed in multiple international CTF competitions, solving advanced, time-constrained challenges across diverse cybersecurity domains.	

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering; CGPA: 7.77</i>	Punjab, India Aug'2023 - Present
Jyoti School Jayant <i>Intermediate; Percentage: 73%</i>	Singrauli, Madhya Pradesh Apr'2021 – Mar'2023
Jyoti School Jayant <i>Matriculation; Percentage: 61%</i>	Singrauli, Madhya Pradesh Apr'2020 – Mar'2021
